It is a solid handsome cake of scouring soap which has no equal for all cleaning purposes except in

the laundry. To use it is to value it. What will SAPOLIO do? Why it will clean paint, make oil-cloths bright, and give the floors, tables and shelves a new appearance. It will take the grease off the dishes and off the pots and pans. You can scour the knives and forks with it, and make the tin things shine brightly. The wash-basin, the bath-tub, even the greasy kitchen sink will be as clean as a new pin if you use SAPOLIO. One cake will prove all we say. Be a clever housekeeper and try it.

EIGHTEEN DROWNED.

One Mine Into Another.

Eighteen men entombed in watery

ful miue disaster that has ever occurred

in the vicinity of Hazelton, Pa. Jeanes-

ville, the pretty little mining village of

J. C. Ilayden & Co., two miles aeross

snlted in such appalling loss of life,

tion and anguish to so many homes and

dear ones. At 11 o'clock Wednesday morning, while Charles Boyle and Pat-

rick Coll, of Leviston, were engaged in drilling a hole in their chamber in the lower clift

of No. 1 slope of J. C. Hayden & Co., at Jeanesville, they broke into the old No.

slope that has been idle for five years and had been flooded to the mouth with

water. Wm. Brislin, a driver, was

driving at the bottom of the slope when

he felt the wind coming, and cried out:

Boys, for God's sake run for your lives or we will all be drowned." In a

moment the force of water came and Brislin barely escaped with his life.

Besides him six others were saved

They are Henry Gibbon, John Neems,

Charles Boyle, William Coyle, door-

tender, and l'atrick Coll. The water

rose rapidly, and before any attempt

could be made to rescue the rest of the

workmen water flowed in, and in five

feet deep, was filled to the month, and

ighteeu meu, who but a few hours be

fore, with light hearts, left the bright

suushine and clear sky to descend into

watery graves, and their lifeless bodies,

black rimmed and maimed, are alone

left to tell the terrible cost of mining

GOOD PIGEON LOFT.

The Plan for Its Construction Presented In Detail. A comfortable and lnexpensive pigeon oft can be constructed on the following plan: Procure six locustor cedar blocks, two feet high, and having inverted tin pans upon them to exclude rats, place them in two rows, three on a side, making the rows sixteen feet long and six feet apart, and upon this foundation place the building. The sills are 3x4inch scantling; the side sills sixteen feet long; the end sills six feet long. Place one end of the frame towards the north. don't know any thing about money aud erect upon the sills fourteen studs of 2x3-inch scantling. Five of these any thing about money! That's pretty studs stand upon each of the side sills. one in the eenter of the north end sill, and two on the south end sill for door posts. On these studs, fasten 2x4-inch plates, and with 2x3-inch rafters, five feet long, to allow twelve-inch projection of roof, we have the frame com- have told me that I couldn't have made ete. The roof can be made of boards a worse bargain.-Boston Courier. ent five fect long, and nailed perpen dieularly, or it can be covered horizontally by planks sixteen feet long. The floor is laid the entire length of the laft, and the south end and the sides nre inclosed with galvanized wire netting, execut next to the north end. which is hoarded up solidly from the floor to the ridge of the roof. Next to this end the sides are also boarded up six feet on the east and west sides to

shelter the nesting places. These

are built by shelves fastened to the

back of the loft, and divided into two compartments, each three feet long; the shelves themselves extending the whole width of the loft, or six feet. The shelves are six in number, and one foot deep, thus forming twelve nesting pens, and such a loit will accommodate twelve pairs of birds, although a small er number would be preferable. In the accompanying cut, one side of the boarding is partly left off to show more plainly the appearance of the shelves in the sheltered recess of the loft. The front of the pens are not nailed, but secured by buttons to admit of their removal for the purpose of cleaning. In the foregoing plan for the con-

struction of loft, with necessary dimensions given, we need only add that in the southern gable a hinged shelf, 36x13 inches, may form an exit for the birds, Why on earth didn't you have It here if full liberty is desired, and we will proceed to the consideration of the loft furniture. This shelf is hinged at the bottom, and is closed by a rope running over a pulley at the top of the aperture which is just the size of the shelf Thus, when the rope is drawn, the shelf eloses noward, and when the rope is re-

laxed, the shelf opens downward, and

mixture with brine until it is about the
